 - These groups represent middle-to-high-income households.
- **Product Categories:**
 - **Clothing & Apparel, Food, and Electronics** were most purchased.
 - **Clothing & Apparel generated maximum revenue.**
- **Top Products:**
 - A few products consistently ranked as best sellers with high order counts.

Final Conclusion

The Diwali sales analysis highlights that **young married women, especially from the 26–35 age group and working in IT, Healthcare, and Aviation sectors, were the most active and highest-spending customers.** States like **Uttar Pradesh, Maharashtra, and Karnataka** contributed the largest share of both orders and sales revenue, showing strong online shopping trends in metro and semi-metro regions. In terms of product preferences, **Clothing & Apparel emerged as the top revenue generator**, followed by Electronics and Food items. Overall, the insights suggest that festive campaigns are most effective when they target **urban working women with lifestyle, fashion, and electronic products**, as this segment drives the majority of festive season sales.
